

Arthropods

Arthropods account for more than 65% of global species and 85% of animal species. On a temperate grassland, arthropods hold a huge biomass (1,000kg/ha), seconded to plant (20,000kg/ha) and microorganisms (7,000kg/ha) but much higher than mammals (1.2kg/ha), birds (0.3kg/ha), and nematodes (120kg/ha). Arthropods play the role of both pests and beneficial organisms. Some arthropods are important crop pests but others are natural enemies. Some arthropods are important health pests but many crustaceans are important food sources of humankind. Arthropods govern the structures and functions of natural ecosystems, but are always ignored by researchers. On the global scale, the surveys of mammals, birds and vascular plants were relatively perfect because they were economically important and easily surveyed. However, arthropods, despite their ecological and economical importance, have not yet been fully surveyed and recorded due to their difficulties to be sampled. The research on arthropods must be further promoted. The journal, *Arthropods*, is inaugurated to provide a public and appropriate platform for the publication of studies and reports on arthropods.

ARTHROPODS (ISSN 2224-4255) is an international journal devoted to the publication of articles on various aspects of arthropods, e.g., ecology, biogeography, systematics, biodiversity (species diversity, genetic diversity, et al.), conservation, control, etc. The journal provides a forum for examining the importance of arthropods in biosphere (both terrestrial and marine ecosystems) and human life in such fields as agriculture, forestry, fishery, environmental management and human health. The scope of *Arthropods* is wide and embraces all arthropods-insects, arachnids, crustaceans, centipedes, millipedes, and other arthropods. Articles/short communications on new taxa (species, genus, families, orders, etc.) and new records of arthropods are particularly welcome.

Authors can submit their works to the email box of this journal, arthropods@iaees.org. All manuscripts submitted to *Arthropods* must be previously unpublished and may not be considered for publication elsewhere at any time during review period of this journal.

In addition to free submissions from authors around the world, special issues are also accepted. The organizer of a special issue can collect submissions (yielded from a research project, a research group, etc.) on a specific topic, or submissions of a conference for publication of special issue.

Editorial Office: arthropods@iaees.org

Publisher: International Academy of Ecology and Environmental Sciences

Address: Flat C, 23/F, Lucky Plaza, 315-321 Lockhart Road, Wanchai, Hong Kong

Articles

Epigeus macroinvertebrates species assemblages along a successional gradient in Hailuotu Island (Bothnia Bay), Finland

Adolfo A. Del Rio Mora 1-19

Mineral composition of edible crab *Podophthalmus vigil* Fabricius (Crustacea: Decapoda)

P. Soundarapandian, D. Varadharajan, S. Ravichandran 20-26

The effects of some domestic pollutants on the cumacean (Crustacea) community structure at the coastal waters of the Dardanelles, Turkey

A.Suat Ates, Tuncer Katagan, Murat Sezgin, et al. 27-42

Redescription and new distributional records of *Matuta planipes* (Fabricius, 1798) (Crustacea; Decapoda; Matutidae) from Chennai Coast, Tamil Nadu

K. Silambarasan, K. Velmurugan, E. Rajalakshmi, et al. 43-47

Checklist of the subfamilies Mirinae and Orthotyliinae (Hemiptera: Heteroptera: Miridae) in western parts of Kerman Province, Iran

Mohsen Shamsi, Reza Hosseini, Asghar Shirvani 48-56

A study on the genus *Orthops* FIEBER (Hemiptera: Miridae: Mirinae) in Iran

Reza Hosseini 57-69

Predatory habits of *Lutzia* (*Metalutzia*) *fuscana* (Wiedmann) (Diptera: Culicidae) in the arid environments of Jodhpur, western Rajasthan, India

Himmat Singh, Robin Marwal, Anusha Mishra, et al. 70-79

Diversity of damselflies (Zygoptera) in Gorewada International Bio-Park, Nagpur, Central India

Patil Kishor Gopal, Shende Virendra Abaji, Uke Shrikant Bhimrao 80-87

New indices for measuring some quality control parameters of the Mediterranean fruit fly, *Ceratitis capitata* (Wied.)

M. F. Mahmoud 88-95
