

Arthropods

Arthropods play the role of both pests and beneficial organisms. Some arthropods are important crop pests but others are natural enemies. Some arthropods are important health pests but many crustaceans are important food sources of humankind. Arthropods govern the structures and functions of natural ecosystems, but are always ignored by researchers. On the global scale, the surveys of mammals, birds and vascular plants were relatively perfect because they were economically important and easily surveyed. However, arthropods, despite their ecological and economical importance, have not yet been fully surveyed and recorded due to their difficulties to be sampled. The research on arthropods must be further promoted. The journal, *Arthropods*, aims to provide a public and appropriate platform for the publication of studies and reports on arthropods.

Arthropods (ISSN 2224-4255) is an international open access (BOAI definition), open peer reviewed online journal (users are free to read, download, copy, distribute, print, search, or link to the full texts of the articles) devoted to the publication of articles on various aspects of arthropods, e.g., ecology, biogeography, systematics, biodiversity (species diversity, genetic diversity, et al.), conservation, molecular biology, biochemistry, physiology, control, etc. The journal provides a forum for examining the importance of arthropods in biosphere (both terrestrial and marine ecosystems) and human life in such fields as agriculture, forestry, fishery, environmental management and human health. The scope of *Arthropods* is wide and includes all arthropods-insects, arachnids, crustaceans, centipedes, millipedes, and other arthropods. Articles/short communications on new taxa (species, genus, families, orders, etc.) of arthropods are particularly welcome.

Authors can submit their works to the email box of this journal, arthropods@iaees.org. All manuscripts submitted to *Arthropods* must be previously unpublished and may not be considered for publication elsewhere at any time during review period of this journal.

In addition to free submissions from authors around the world, special issues are also accepted. The organizer of a special issue can collect submissions (yielded from a research project, a research group, etc.) on a specific topic, or submissions of a conference for publication of special issue.

Editorial Office: arthropods@iaees.org

Publisher: International Academy of Ecology and Environmental Sciences

Address: Unit 3, 6/F., Kam Hon Industrial Building, 8 Wang Kwun Road, Kowloon Bay, Hong Kong

Articles

Effect of water-washing on control of citrus cottony scale, *Pulvinaria aurantii* Cockerell (Hemiptera: Coccidae) in field conditions

Ghazaleh Amooei Maleh, Ali Moghimian Sooraki, et al. 160-173

First report on the gut metabolites of *Hyposidra talaca* and *Biston suppressaria* (Geometridae: Lepidoptera) from tea plantation of West Bengal, India, with an insight on its pesticide resistance property

Preeti Subba, Soumya Majumder, Malay Bhattacharya 174-186

Two new host plant records for Asian weaver ant (*Oecophylla smaragdina* Fab., 1775)

Pawan U. Gajbe 187-191

Phenotypic variations among selected synanthropic beetles collected in urban areas of Mindanao, Philippines

Ernel D. Bagbag, Cesar G. Demayo, et al. 192-207

Species composition, abundance and diversity of mosquitoes (Culicidae: Diptera) larvae in Qua'an-Pan Local Government Area, Plateau State, Nigeria

Michael Pangwa Lapang, Davou Dung Pam, et al. 208-224

Catalogue of tri-trophic associations of the common hover fly *Ischiodon scutellaris* (Fabricius, 1805) (Syrphidae: Diptera: Insecta) in India

Rajendra Singh 225-245
