

Selforganizology

The Selforganizology (ISSN 2410-0080) is an open access, peer-reviewed online journal that considers scientific articles in all different areas of selforganizology. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these fast moving areas. The topics to be covered by Selforganizology include, but are not limited to:

- Innovative theories and methods on self-organization.
- Applications of evolution-, interaction-, behavior-, organization-, intelligence- and feedback-based theories, such as coevolution theory, coextinction theory, community succession theory, correlation analysis, parrondo's paradox, game theory, neural networks, artificial intelligence, behavioral theory, organization theory, and automation theory, in self-organization.
- Simulation and modeling of self-organization systems.
- Algorithms of self-organization, including intelligence computation (swarm intelligence algorithms, genetic algorithms, etc.), cellular automata, self-adaptation and automation, etc.
- Various self-organization phenomena in nature.

We are particularly interested in short communications that clearly address a specific issue or completely describe a new self-organization phenomenon.

Authors can submit their works to the email box of this journal, selforganizology@iaeess.org. All manuscripts submitted to this journal must be previously unpublished and may not be considered for publication elsewhere at any time during review period of this journal. Authors are asked to read and accept Author Guidelines and Publication Ethics & Malpractice Statement before submitting manuscripts.

In addition to free submissions from authors around the world, special issues are also accepted. The organizer of a special issue can collect submissions (yielded from a research project, a research group, etc.) on a specific research topic, or submissions of a scientific conference for publication of special issue.

Editorial Office: selforganizology@iaeess.org

Publisher: International Academy of Ecology and Environmental Sciences

Address: Unit 3, 6/F., Kam Hon Industrial Building, 8 Wang Kwun Road, Kowloon Bay, Hong Kong

Tel: 00852-2138 6086

Fax: 00852-3069 1955

E-mail: office@iaeess.org

Articles

Pattern classification of HLA-DRB1 alleles, human races and populations:

Application of self-organizing competitive neural network

WenJun Zhang, YanHong Qi 138-142

Interspecific associations of weed species around rice fields in Pearl River

Delta, China: A regional survey

WenJun Zhang , Rui Wang, DanLin Zhang, Wu Wei, HaiDong Chen 143-205

A mini review on theories and measures of interspecific associations

Malhaba Maihaiti, WenJun Zhang 206-210

A new game theory algorithm simulates soccer matches: Reducing complexity to its irreducible essence

Alessandro Ferrarini 211-218

Book Review

A review on the book, *Grasslands: Types, Biodiversity and Impacts*

GuangHua Liu 219-223

The International Academy of Ecology and Environmental Sciences (IAEES) is a nonprofit and registered international organization. It devotes to promote global ecology and environmental sciences and protect global ecological environments, by publishing scientific publications, conducting research activities, launching environmental programs, disseminating knowledge and technologies, sponsoring conferences, and providing information and discussion spaces, etc. The responsibility for these publications rests with the International Academy of Ecology and Environmental Sciences.
